Module Overview

In this module, you will revise all that you have covered in this course, and learn how to keep tuned into signals as you continue to use your unconscious mind to help you get clarity on your next career move. You will also find out where you can go for more support either to reach clarity, or in moving to finding and landing a new job. The clarity for your next step may also be uncovered in this module.

Module Outcomes

By the end of this module you will:

- Know how to continue using your unconscious mind if you have not yet reached clarity for your next career move;
- Know there are further avenues of support available to you, and what these are, to:
 - Achieve your clarity of your next career move;
 - Finding and landing your dream job.
